

Peak Seasons Plan

Spring

The blossom of flowers and budding of trees signify the waking of nature. Did you know all bugs try to hibernate? For any that have hibernated in your house we treat the interior. We treat the full exterior of your home to keep any others out! We check for pest activity over the winter and remove any spider webs and wasp nests from the exterior of your home.

Summer

Carpenter ants, pavement ants, stinging insects, and creepy crawlies like the summer heat. Our exterior spray keeps all those pests away. At this visit we do a thorough check of the exterior of your home for any stinging insect activity. If found, we treat and remove right away!

Fall

The crunch of leaves underfoot and the crisp breeze pairs well for a favorite season for many. We love fall too, and will keep your home pest free. Our exterior power sprays are essential to keeping out any fall invaders from spiders and centipedes to boxelder bugs and Asian beetles, even hornets and wasps! We treat the house from foundation to soffits. We also prepare your home so mice don't get in either.

Winter

While we don't have designated visit over the winter, we are available if you need anything rodent or crawling insect related. If we don't see you over the winter, we'll see you in the spring!
